Allowable Subject Matter

1. Claims 18-19 are allowed.

Claim 18 is independent claim.

The following is an examiner's statement of reasons for allowance:

As to claim 18, the present invention from the application discloses a print progress notifying device having “counting means for counting a printed raster number during the elapsed time; and predicting means for predicting at least one of a remaining time duration required for completing the print operations and a completion time at which the print operations for the print data are completed, based on multiplying said elapsed time by said total raster number and dividing by said printed raster number”. The closest prior art such as Tsukamoto et al. (US Patent No. 5,668,641) teaches the time and the number of steps required for printing from a time when the binary signal is received and confirmed may be assumed and calculated in accordance with the number of frames to be printed, the number of lines to be printed. However, Tsukamoto, including an updated electronic text search, fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
